

COVID-19 Rapid Test Screening

Rapid testing is for screening purposes only and should not be used for diagnosis of COVID-19 infection in symptomatic individuals or individuals with known close contact with a positive COVID-19 case. Rapid testing is an additional screening tool in efforts to detect COVID-19.

What to do, if a COVID-19 rapid test shows positive:

Step 1:

Contact Prince Edward County's local COVID-19 Assessment and Screening Centre in Picton to make a Covid-19 testing appointment: 613-813-6864, or access the list of other COVID-19 testing centres closest to you to make a Covid-19 testing appointment through the Hastings Prince Edward Public Health Unit website: <https://hpepublichealth.ca/getting-tested-for-covid-19/>

Step 2:

Wait for your results and be sure to self-isolate until your results are confirmed. Results take about 24-hours.

Questions? Call the Hastings Prince Edward Public Health at:
(613) 966-5500 or Toll-Free: 1-800-267-2803
